

TURNING - MILLING- DRILLING- PLANING

Our company activities include metal and plastic semi-finished and finished products machining (with raw material procurement), spare parts and special machines manufacturing and also assembling. Based on customer technical drawings we offer designing and production of workpieces in custom, small, and medium series. With our reliable partners, we also provide high quality heat and surface treatment. We have practice in prototype manufacturing and in the production of spare parts which are not manufactured in large scale.

We gladly think together with you and help you in planning, drawing and manufacturing. If required, we undertake a zero production run or a sample manufacturing free of charge (at material and tool prices).

Our features are precision, quality work, fastness and flexibility.

Our machines:

CNC turning machines

- **Gildemeister Max- Müller MD 5 S**
swing 500 mm, distance between centers 1000 mm
- **Gilmdeister N.E.F. CT 40**
swing 400 mm, distance between centers 600 mm

CNC milling machines, machining center

- **MAHO MH 800 C**
machining range (mm) : 800x500x600
NC round table, automatically swivelling head, tool magazine
- **Hermle UWF 851 Universal CNC toolroom milling machine**
machining range (mm): 600x450x400
NC round table

Conventional machines

- **UMA 17 lathe**
- **HAHN und KOLB RE 25 Precision revolver lathe**
- **Go- Well BRJ milling machine**
digital measuring system
machining range (mm): 675x305x405
- **Klopp 625 shaper machine**
planing width: 625 mm

Welding:

- **flame welding, TIG, MIG, spotwelding**

Saws

- **Eisele VMSI/041 circular saw**
- **Forte BA 251 automatic band saw machine**
up to 250 mm diameter
- **Behringer hacksaw machine**
